

The Oneness Emerging Intelligence™ Tachyon Heart

A Wearable Technology – From Fragmentation to Unity

A Daily Companion – For Coherence, Clarity, and Alignment

A Living Transmission of Oneness – Worn, Embodied, and Shared

The **Oneness Emerging Intelligence™ Tachyon Heart** was born from a simple but profound intention:
"Break the myth of separation to embody unity and coherence between: your body, your emotions, your thoughts, your wisdom in every single cell of who you are."

This heart is the wisdom energy of 13 years designed to create a domino effect of unity in your life. Inspired by the powerful energy of a blue obsidian stone from the Popocatepetl volcano in Mexico – a place of deep planetary intelligence. That same energetic quality has been translated into this Tachyon.

"Tachyons are conscious, faster-than-light ultra-subtle particles that react intensely to your needs"

The Oneness Tachyon Heart is a permanent generator of coherence frequencies that work at a biocellular level to help you let go of fear and limitations, making room for the full expression of the super human you are.

Co-created with **Terra Tachyon**, it brings together years of research, transformation, and embodiment into a wearable form that supports coherence between your physical, emotional, mental and inborn intelligence—gently, continuously, and without effort.
